

Acute, Obtuse, and Right Triangles: Worksheet 5.1

Name Date Score

Identify each of the triangles as acute, obtuse or right triangles.

1. A right triangle with the right angle at the top-left vertex.
2. An equilateral triangle where all three sides are of equal length.
3. An obtuse triangle with the obtuse angle at the top-left vertex.
4. An acute triangle with all three angles being acute.
5. A right triangle with the right angle at the top-left vertex.
6. An equilateral triangle where all three sides are of equal length.
7. An obtuse triangle with the obtuse angle at the bottom-left vertex.
8. An acute triangle with all three angles being acute.
9. A right triangle with the right angle at the bottom-left vertex.
10. An equilateral triangle where all three sides are of equal length.

Solutions: Worksheet 5.1

1. Right triangle
2. Acute triangle
3. Obtuse triangle
4. Obtuse triangle
5. Right triangle
6. Acute triangle
7. Obtuse triangle
8. Acute triangle
9. Obtuse triangle
10. Acute triangle
