# SAP PI MOCK TEST

This section presents you various set of Mock Tests related to **SAP PI**. You can download these sample mock tests at your local machine and solve offline at your convenience. Every mock test is supplied with a mock test key to let you verify the final score and grade yourself.

SAP PI MOCK TEST I

Q 1 - Which of the following is not a capability of SAP PI system?

A - Connectivity

B - Routing

C - Mapping

D - ETL

Q 2 - In SAP PI installation, which of the following installation option provides run time engines-Integration Engine, Business Process Engine, and Advanced Adapter Engine for PI design and configuration?

A - Advance Adapter Engine Extended

B - Dual Usage type

C - Stand alone

D - None of these

Q 3 - In SAP PI architecture, which of the following is used for routing and mapping and provides central integration server services and mapping runtime for source and target system?

A - Runtime Workbench

B - Business Process Engine

C - Integration Engine

D - Central Advanced Adapter Engine AAE

Q 4 - In latest releases when SAP PI moved to single stack system, new engine is known as Advanced Adapter Engine AAE contains?

A - most of the adapters are Java stack and only two adapters are based on ABAP stack

B - most of the adapters are ABAP stack and only two adapters are based on Java stack

C - All are also moved to Java stack adapters.

D - All are also moved to ABAP stack adapters.

Q 5 - Which of the following contain objects like mapping, interfaces and process definitions in PI system?

A - Services Registry

B - Enterprise Service Repository

C - System Landscape Directory

D - Integration Directory

Q 6 - In SAP PI system, which of the following acknowledgement type is available for asynchronous communication?

A - ABAP Acknowledgement

B - Java Acknowledgement

C - HTTP Acknowledgement

D - System Acknowledgement

Q 7 - In latest releases of SAP PI, ABAP stack components are modified to work on Java stack so SAP PI needs only Java stack to run and is called single stack system?

A - True

B - False

Q 8 - In SAP PI system, which of the following conversion parameters are available in the SOAP adapter?

A - File content Conversion

B - Sync/Asynch bridge

C - Keep Headers

D - All of the above

Q 9 - Which if the following is not an advantage of using Enterprise service repository in PI

Q 9 - Which if the following is not an advantage of using Enterprise service repository in PI system?

A - Mapping of messages as per sender and receiver data structure

B - Fast implementation based on pre-configured content that supports industry standards

C - You can design Interface objects, mapping objects and integration processes.

D - Additional configuration options for the Advanced Adapter Engine Extended

Q 10 - Which of the following is not a UI tool under Enterprise Service Repository ESR in PI system?

A - Enterprise Service Builder

B - Web UI

C - Service Registry

D - Integration Builder

Q 11 - In ES Repository web based interface, you can

A - Search for service interface, data types, etc.

B - Subscribe for notifications

C - Manage lifecycle status of service interfaces, data types, etc.

D - All of the above

Q 12 - In SAP PI integration directory, which of the following configuration is used to determine inbound interface to which message to be sent and interface mapping for processing the message?

A - Sender Agreement

B - Receiver Determination

C - Interface Determination

D - Receiver agreement

ANSWER SHEET

Question Number	Answer Key
1	D
2	B
3	C

4	C
5	B
6	D
7	A
8	C
9	D
10	D
11	D
12	C
